

Are you #GenerationPostura?

If you have attended school in the UK over the past 20 years, then the answer to this question is more than likely to be a 'yes' – and you'd be one of millions. A steadfast companion to countless students every day, KI's Postura+ chair has helped an entire generation reach their true potential, a generation that

continues to grow exponentially. Postura+ chairs can be found everywhere from educational institutions through to libraries and day care centres, and they were recently specified for the 2015 RIBA Stirling Prize winning Burntwood School. Our chairs are the cornerstone of happy, healthy, high performing learning environments. Introduced to the UK in 1996 and manufactured locally since 2008, the Postura+ was the first one-piece polypropylene chair designed especially for educational environments. Quickly becoming the market leader, Postura+ continues to be purchased in record numbers each year with sales to over 16 countries in 2015. Setting the benchmark for classroom seating, the ergonomic, functional design and vibrant colourways of Postura+ chairs have made them the first choice for thousands of schools and they can be counted in the

millions all over the country.

Postura+ chairs are built to last, tried and tested in the toughest of education environments they remain unsurpassed as the only chair in its class to outlive its warranty. It has stood the test of time and will continue to provide comfort and flexibility for millions more children in years to come, growing the ranks of what we call "#GenerationPostura".

The full, extended Postura+ range including task chairs, stools and high chairs will be on display for the first time at the Education Show in 2016. Designed to maximise learning outcomes through better design, the expanded collection provides schools even more seating options from a name they know and trust.
