ZIG WORKSTATIONS

SPECIFICATION GUIDE

MADE IN THE UK

Lead Time
6 weeks

Warranty
Workstations steel understructure – 25 years
Worktops – 5 years
Screen fabric – Fabric manufacturer's warranty

Please refer to www.kieurope.com/workstations/zig-workstations/ for product finishes.

How to Order

A list of commonly specified pre-figured builds is listed on pages 6-11. Simply order the bench required plus screens and any accessories.

For more bespoke requirements, refer to the component list on pages 12-19, plus screens and accessories. If you require assistance please contact the KI Sales team.

Indoor Advantage Gold - Furniture
This product is certified to Indoor Advantage Gold - Furniture, making it suitable for many building rating systems, including LEED v4, BREEAM, & WELL Building.

Summary
KI's Zig bench & desk collection combines simple clean design with robust construction and complements KI's full range of workplace furniture. The modular platform features an innovative leg-to-rail connection. Consisting of a kinked tubular leg frame and single traverse rail design with KI-branded end caps, it ensures clear, unencumbered space both above and below the worksurface.

Simple in its design and built with high-quality components, it is the most easily assembled KI system product.

Workstations

Key Facts
- Designed & manufactured in the UK
- Simple, uncluttered construction, easy to assemble & reconfigure
- Screen heights align with KI's other screens, storage, breakout standards
- Drop-down cable tray
- Metal-to-metal connectivity ensures durability for long term reconfiguration
- A, E, L & T Series screens can be fitted to the worktop or directly to the frame

Configurations available:
- Back-to-back bench at fixed height (740mm)
- Single desks at fixed height (740mm)
- Desk returns

Structure
- Understructure: simple, modular, light, easy to assemble. Steel frame connected by transverse rails that support the worktops
- Stable, fully welded 38mm powder coated tube steel frame and rectangular tube spigot traverse rail construction.
- Standard double row depths available: 1200, 1400, 1600mm
- Standard single desk depths available: 600, 700, 800mm
- Standard widths available (double row & single desk): 1000, 1200, 1400, 1600, 1800mm
- Longer runs can be achieved adding intermediate legs and additional rails
- Worktops supported by a single rail set well back from users' legs
- Return worktops can be added to the desk & bench
- Bench cantilevered meeting end option

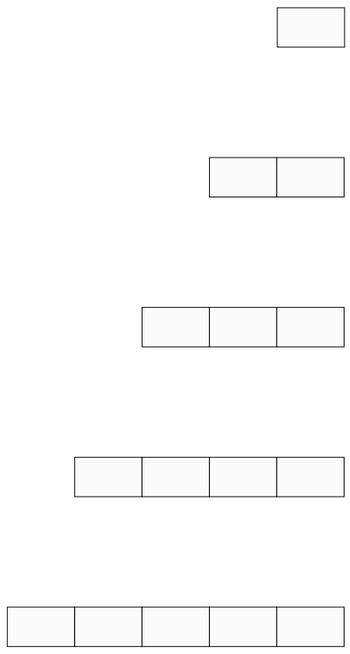
Materials and Surfaces
- 25mm MFC and MDF worktops with 2mm ABS edge.
- Square or 100mm radiused corners
- 740mm height fixed worktops available in all KI standard finishes.

IT Integration and Cable Management
- Drop-down cable trays fixed to underside of worktop
- Various options for grommets and scalloped edges for cable management

Accessories
- A, E, L & T Series full width or inset screens.
- Modesty & End-leg infill panels
- Mass cable riser
- Cantilevered meeting ends

Finishes
Note: 25% surcharge for non-standard colours, no MOQ.
Please refer to www.kieurope.com/tables/zig-workstations/ for standard product finishes.

Prefigured desks - 1200mm sections



How to order:
1. Select prefigured build required.
Prefigured workstation builds includes understucture, MFC worktops and fixings. For rounded corners on the ends add **/R**

2. If required, add optional items (screens, cable trays etc).

For finishes refer to
www.kieurope.com/workstations/zig-workstations/

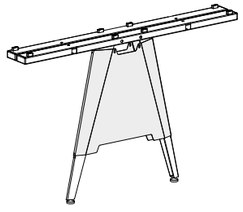
Intermediate Leg Mass Cable Riser	CN3/KI/ZIG/MCR



KI products are designed and manufactured to withstand the tough demands of work environments. Care and regular light cleaning will keep the furniture looking its best for many years.

IMPORTANT CARE & SAFETY INFORMATION

- Melamine/MFMDF and other decorative worksurfaces will naturally wear over time resulting in shiny patches, particularly parts that are regularly used for mouse control and where the worksurface comes into contact with clothes, skin etc.
- **Always use mouse mats to minimise the long-term effects of continuous contact and movement within the same area of the top.**

- Once the workstations/tables have been assembled, sited and wired they should not be moved
- Never attempt to drag them across the floor, which will stress and strain the end legs
- Avoid placing your furniture in direct sunlight, as sunlight causes fading
- Mats and coasters must be used as they offer the best protection from scratches, hot liquid and water marks
- Heavy office equipment such as printers should be placed on protective pads to avoid scratches to the worksurface
- Never drag heavy equipment across a worktop as this will damage the worksurface
- Do not immerse any part of the workstations/tables in water or any liquid
- Check all cords (power, control keypad, etc.) every 6 months to make sure there are no kinked, pinched or frayed wires

Should any items of furniture require repair, please contact KI (UK) Ltd for further information.

The guide below is intended to help where furniture has become marked or stained. Please check for colour fading in a discreet area when using any detergents or chemicals. Always follow the manufacturer of the cleaning products' instructions before use.

GENERAL CARE

Proper care and careful use are the best methods of maintaining the appearance and finish of any product. Any desk or table worksurface is vulnerable to scratching and damage.

Your workstations/tables metal understructure is finished with durable powder-coated paint. Worktops are generally Melamine Faced Chipboard (MFC) or Melamine Faced Medium Density Fibreboard (MFMDF) (laminated).

Other worktop finishes e.g. Lino or Fenix NTM® should be cleaned according to the manufacturer's instructions.

Apart from regular cleaning, KI workstations are considered to be maintenance free however the following should be observed during a bench's lifetime:

FRAMEWORK

- Where cleaning of the frame is required, a mild detergent solution should be used
- Harsh abrasives, acids, alkalis or bleaching products should not be used
- Touch-up paint in all standard KI colours is available to repair minor chips and scratches. Follow the instructions on the packaging to ensure the best results.

Care & maintenace

MFC/ MFMDF WORKTOPS

- Melamine faced worksurfaces will naturally wear over time, particularly parts that are regularly rubbed. Utilizing a mouse mat will protect against this natural wear and tear.
- Work tops are easy to maintain, simply use a damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
- Potential stains should be removed immediately (the use of abrasive cleaners should always be avoided)
- Use an all-purpose cleaner to remove ink stains, crayon and water-based paint marks
- Use thinners to remove oil-based paint stains (pour onto a soft cloth, not directly on the surface) - avoid contact with the worktop edging, as this will cause damage
- Never use excessive water to clean work surfaces. Wetness or excessive moisture can cause laminate worktops to swell, warp or appear to grow in thickness

SCREENS

A variety of privacy and divider screens are made of an aluminium frame and fabric or fabric covered board, some styles have a powder coated frame in matching or accent colours. The same regime applies for screens frames as it does for the rest of the bench frame. For screen fabrics please refer to the specific fabric manufacturer's website for cleaning and maintenance details. Here is some general advice:

- Fabrics can be regularly vacuumed to prevent build-up of dust and dirt on the fabric surface
- Get to spills and potential stains quickly. Mop up the excess liquid using kitchen roll or a damp cloth. Then clean using a branded upholstery shampoo, detergent or hand wash according to the fabric manufacturer's instructions
- Wipe down acrylic blade screens with a soft, damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
