SIT STAND COLLECTION

WORK 2.1 CORE

SPECIFICATION GUIDE
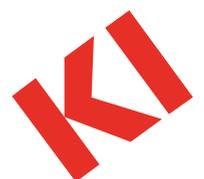

KI

Contents

About Work2.1 Core - Next generation of sit-stand solutions for improved worker wellbeing.

KI's proven sit-stand bench and desk system. A flexible & modular system for creating a variety of work settings. Available as back-to-back and single desks with fixed or sliding tops, Work2.1 uses the latest technology in powered sit-stand actuator design with integrated obstruction sensor safety mechanism.

Work2.1 Core is borne of extensive co-creation with clients working on projects which require complex cabling, monitors and accessories.

Work2.1 Core is designed to make the management of these requirements as easy as possible for IT and FM teams. Manufactured on rapid lead-times, Work2.1 Core is produced to the highest engineering standards in modern, highly automated factories using the best quality materials and workmanship.

Worktops
Back-to-back (bench) and single desks are available in 25mm thick MFC as standard with the option of 25mm thick MDF with chamfered edge. The standard module widths are 1000mm, 1200mm, 1400mm, 1500mm 1600mm & 1800mm. The worktops are shorter by 25mm each side to create safety gaps between them.
- Single desk standard depth 800mm (720-900mm potential range – fixed tops only)
- Back-to-back (bench) standard depth 1600mm (1300-1600mm potential range fixed tops only)

Available with fixed or sliding tops.

Screens - Work2 Sit-Stand Benches & Desks
- A Series Screen - is a 27mm fully upholstered fabric covered panels with aerodynamic frameless edge. A Series Screen can be specified in Band Y - a 34mm thick foam backed, available in Blazer Lite only.
- E Series Screen - is a 25mm fully upholstered fabric covered screen designed to give you matching fabric trim.
- C Series Screen - is fully upholstered in soft feel fabric with a signature edge stitch detail.
- T Series Screen - is a 30mm upholstered panel with aluminium trim on three sides and a single tool rail.

IT Integration & Cable Management
- Large front access back-to-back shared lower cable tray
- Large drop-down upper cable tray
- Single desk lower mass cable tray with modesty screen mounting point
- Cable chain to connect lower and upper trays
- Cable chain 'parking' channel on the top face of the mass cable riser
- Nylon sock accessory for floor grommet to lower tray
- Desk mounted power/data options, can be fitted to worksurface or rear tool rail

For finish options refer to **https://www.kieurope.com/workstations/work2-1-core-workstations/**

Warranty Information
- 25 years on understructure
- 10 years on actuators
- 5 years on standard MFC or MDF worktops
- 25 years on screen structure. Fabric and Perspex panels subject to manufacturer's warranty

Indoor Advantage Gold - Furniture
This product is certified to Indoor Advantage Gold - Furniture, making it suitable for many building rating systems, including LEED v4, BREEAM, & WELL Building.

General Dimensions

1000, 1200, 1400, 1500, 1600 & 1800mm

650-1300mm max

1350-1600mm

1114mm & 1153mm
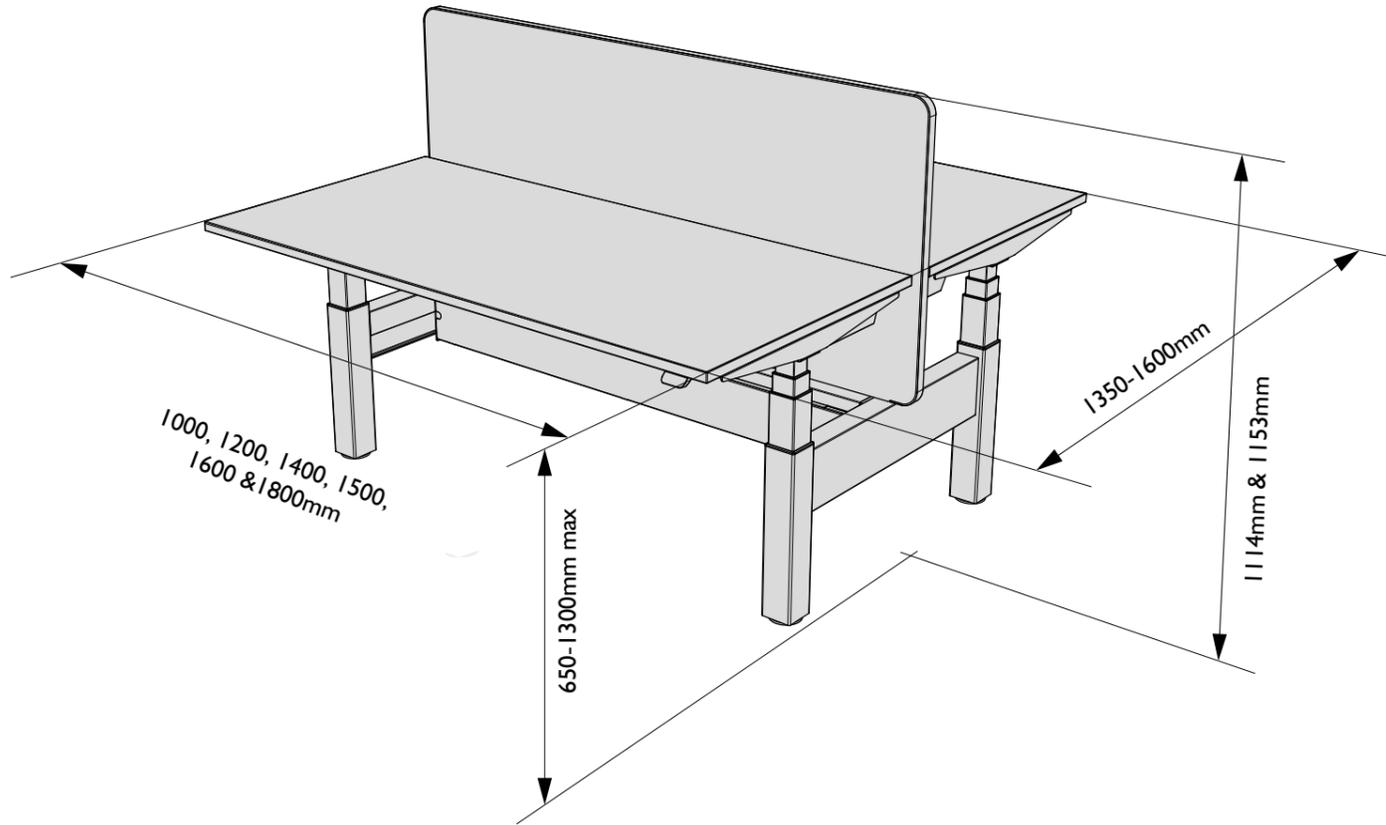

Due to the height restriction when the desk is set at it lowest position, the pedestals below are recommended for use with Work2.1 Sit Stand range. If using a seat pad please check with your Sales Manager.

Description	Product Code	Dimensions
Mobile, A4 width, low height. 1x box drawer 1x filing drawer Plastic pen tray	94000-U8	415mm (w) 481mm (h) 555mm (d)
Mobile, narrow width, low height. 1x box drawer 1x filing drawer Plastic pen tray	94060-U8	315mm (w) 481mm (h) 555mm (d)

Linking Benches
When frames are immediately adjacent to each other, the end legs can be linked (use W21/SS/KI/LINK) and then shrouded using the linked end leg mass cable shroud (W21/SS/KI/EL/SHRD)

This option not only gives a clean look to the linked bench frames, but also provides a large volume void within which cables can be hidden.
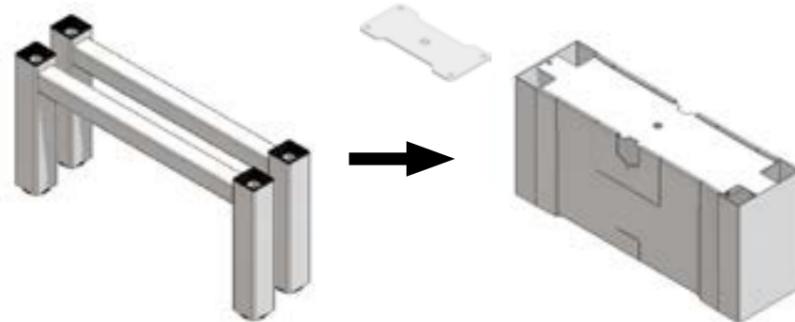

How to order:
1. Select prefigured build required.
Includes actuators, foot pack, upper beam, standard control panel & MFC worktop.

2. For optional extras (cable trays, end leg shrouds etc) refer to pages 14-19.

3. For screens and fixings as separate line items. See pages 26-27.

For finish options refer to

Requires 2 pairs of SBKT/151 brackets per screen.

T Series (Full Width Only)

Double Row bench screen fixings

Description	Product Code
Spigot Bracket (pair) Inset screen & full width	WK2/SBKT/151

*For A, C, E,& T Series
screens only. 2 pairs required
per screen.*

KI products are designed and manufactured to withstand the tough demands of work environments. Care and regular light cleaning will keep the furniture looking its best for many years.

IMPORTANT CARE & SAFETY INFORMATION

- Melamine/MFMDF and other decorative worksurfaces will naturally wear over time resulting in shiny patches, particularly parts that are regularly used for mouse control and where the worksurface comes into contact with clothes, skin etc.
- **Always use mouse mats to minimise the long-term effects of continuous contact and movement within the same area of the top.**

- Once the workstations/tables have been assembled, sited and wired they should not be moved
- Never attempt to drag them across the floor, which will stress and strain the end legs
- Avoid placing your furniture in direct sunlight, as sunlight causes fading
- Mats and coasters must be used as they offer the best protection from scratches, hot liquid and water marks
- Heavy office equipment such as printers should be placed on protective pads to avoid scratches to the worksurface
- Never drag heavy equipment across a worktop as this will damage the worksurface
- Do not immerse any part of the workstations/tables in water or any liquid
- Check all cords (power, control keypad, etc.) every 6 months to make sure there are no kinked, pinched or frayed wires

Should any items of furniture require repair, please contact KI (UK) Ltd for further information.

The guide below is intended to help where furniture has become marked or stained. Please check for colour fading in a discreet area when using any detergents or chemicals. Always follow the manufacturer of the cleaning products' instructions before use.

GENERAL CARE

Proper care and careful use are the best methods of maintaining the appearance and finish of any product. Any desk or table worksurface is vulnerable to scratching and damage.

Your workstations/tables metal understructure is finished with durable powder-coated paint. Worktops are generally Melamine Faced Chipboard (MFC) or Melamine Faced Medium Density Fibreboard (MFMDF) (laminated).

Other worktop finishes e.g. Lino or Fenix NTM® should be cleaned according to the manufacturer's instructions.

Apart from regular cleaning, KI workstations are considered to be maintenance free however the following should be observed during a bench's lifetime:

FRAMEWORK

- Where cleaning of the frame is required, a mild detergent solution should be used
- Harsh abrasives, acids, alkalis or bleaching products should not be used
- Touch-up paint in all standard KI colours is available to repair minor chips and scratches. Follow the instructions on the packaging to ensure the best results.

MFC/ MFMDF WORKTOPS

- Melamine faced worksurfaces will naturally wear over time, particularly parts that are regularly rubbed. Utilizing a mouse mat will protect against this natural wear and tear.
- Work tops are easy to maintain, simply use a damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
- Potential stains should be removed immediately (the use of abrasive cleaners should always be avoided)
- Use an all-purpose cleaner to remove ink stains, crayon and water-based paint marks
- Use thinners to remove oil-based paint stains (pour onto a soft cloth, not directly on the surface) - avoid contact with the worktop edging, as this will cause damage
- Never use excessive water to clean work surfaces. Wetness or excessive moisture can cause laminate worktops to swell, warp or appear to grow in thickness

SCREENS

A variety of privacy and divider screens are made of an aluminium frame and fabric or fabric covered board, some styles have a powder coated frame in matching or accent colours. The same regime applies for screens frames as it does for the rest of the bench frame. For screen fabrics please refer to the specific fabric manufacturer's website for cleaning and maintenance details. Here is some general advice:

- Fabrics can be regularly vacuumed to prevent build-up of dust and dirt on the fabric surface
- Get to spills and potential stains quickly. Mop up the excess liquid using kitchen roll or a damp cloth. Then clean using a branded upholstery shampoo, detergent or hand wash according to the fabric manufacturer's instructions
- Wipe down acrylic blade screens with a soft, damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
