SIT STAND COLLECTION

TRIM

SPECIFICATION GUIDE

Made in UK

Overview

Trim is a value-driven sit-stand desk designed to support wellbeing by making movement at work accessible to everyone. By encouraging regular changes in posture throughout the day, Trim helps reduce the risks associated with prolonged sitting and supports healthier, more ergonomic work habits.

Combining KI's trusted quality and service with a straightforward height-adjustable design, Trim focuses on the essential benefits of sit-stand working through a deliberately simple, standardised statement of line that seamlessly complements the more flexible, design-led sit-stand systems within the KI portfolio.

Worktops

Back-to-back (bench) and single desks are available with 25mm thick MFC worktops. The standard module widths are 1000mm, 1200mm, 1400mm, 1500mm & 1600mm. The worktops are shorter by 25mm each side to create safety gaps between them.

- Height range 624mm - 1274mm
- Fixed tops
- Single desk standard depths 615mm, 700mm & 800mm
- Back-to-back (bench) standard depth 1230mm, 1400mm & 1600mm.

Screens - Benches & Desks

- A Series Screen - 25mm thick fully upholstered fabric covered panels with aerodynamic frameless edge.
- E Series Screen - 25mm fully upholstered fabric covered screen with matching fabric trim.

IT Integration & Cable Management

- Shared lower cable tray with open top access
- Drop-down upper cable tray
- Integrated magnetic cable cover within the upper frame
- Optional additional drop-down upper cable tray
- Cable chain to connect lower and upper trays
- Nylon sock accessory for floor grommet to lower tray
- Desk mounted power/data options, can be fitted to worksurface
- Scallop, grommet & other worktop cable management options available

Two-Tone Finish - Back-to-back benches

- Extended finish options available on the actuator leg beams and lower tray, surcharge applies.

For finish options refer to <https://www.kieurope.com/workstations/trim/>

Warranty Information

- 15 years on understructure
- 3 years on actuators
- 5 years on standard worktops

Due to the height restriction when the desk is set at its lowest position, the pedestals below are recommended for use with Trim Sit Stand range. If using a seat pad please check with your Sales Manager.

Description	Product Code	Dimensions
Mobile, A4 width, low height. 1 x box drawer 1 x filing drawer Plastic pen tray	94000-U8	415mm (w) 481mm (h) 555mm (d)
Mobile, narrow width, low height. 1 x box drawer 1 x filing drawer Plastic pen tray	94060-U8	315mm (w) 481mm (h) 555mm (d)

Prefigured single desks

How to order:

1. Select prefigured build required.

Includes actuators, foot pack, upper beam, upper cable tray, standard memory panel & MFC worktop. Upper beam includes magnetic cable cover panel.

2. For optional screens and accessories refer to pages 10-13.

For finish options refer to

<https://www.kieurope.com/workstations/trim/>

E Series

KI products are designed and manufactured to withstand the tough demands of work environments. Care and regular light cleaning will keep the furniture looking its best for many years.

IMPORTANT CARE & SAFETY INFORMATION

- Melamine/MFMDf and other decorative worksurfaces will naturally wear over time resulting in shiny patches, particularly parts that are regularly used for mouse control and where the worksurface comes into contact with clothes, skin etc.
- **Always use mouse mats to minimise the long-term effects of continuous contact and movement within the same area of the top.**
- Once the workstations/tables have been assembled, sited and wired they should not be moved
- Never attempt to drag them across the floor, which will stress and strain the end legs
- Avoid placing your furniture in direct sunlight, as sunlight causes fading
- Mats and coasters must be used as they offer the best protection from scratches, hot liquid and water marks
- Heavy office equipment such as printers should be placed on protective pads to avoid scratches to the worksurface
- Never drag heavy equipment across a worktop as this will damage the worksurface
- Do not immerse any part of the workstations/tables in water or any liquid
- Check all cords (power, control keypad, etc.) every 6 months to make sure there are no kinked, pinched or frayed wires

Should any items of furniture require repair, please contact KI (UK) Ltd for further information.

The guide below is intended to help where furniture has become marked or stained. Please check for colour fading in a discreet area when using any detergents or chemicals. Always follow the manufacturer of the cleaning products' instructions before use.

GENERAL CARE

Proper care and careful use are the best methods of maintaining the appearance and finish of any product. Any desk or table worksurface is vulnerable to scratching and damage.

Your workstations/tables metal understructure is finished with durable powder-coated paint. Worktops are generally Melamine Faced Chipboard (MFC) or Melamine Faced Medium Density Fibreboard (MFMDf) (laminated).

Other worktop finishes e.g. Lino or Fenix NTM® should be cleaned according to the manufacturer's instructions.

Apart from regular cleaning, KI workstations are considered to be maintenance free however the following should be observed during a bench's lifetime:

FRAMEWORK

- Where cleaning of the frame is required, a mild detergent solution should be used
- Harsh abrasives, acids, alkalis or bleaching products should not be used
- Touch-up paint in all standard KI colours is available to repair minor chips and scratches. Follow the instructions on the packaging to ensure the best results.

MFC/ MFMDf WORKTOPS

- Melamine faced worksurfaces will naturally wear over time, particularly parts that are regularly rubbed. Utilizing a mouse mat will protect against this natural wear and tear.
- Work tops are easy to maintain, simply use a damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
- Potential stains should be removed immediately (the use of abrasive cleaners should always be avoided)
- Use an all-purpose cleaner to remove ink stains, crayon and water-based paint marks
- Use thinners to remove oil-based paint stains (pour onto a soft cloth, not directly on the surface) - avoid contact with the worktop edging, as this will cause damage
- Never use excessive water to clean work surfaces. Wetness or excessive moisture can cause laminate worktops to swell, warp or appear to grow in thickness

SCREENS

A variety of privacy and divider screens are made of an aluminium frame and fabric or fabric covered board, some styles have a powder coated frame in matching or accent colours. The same regime applies for screens frames as it does for the rest of the bench frame. For screen fabrics please refer to the specific fabric manufacturer's website for cleaning and maintenance details. Here is some general advice:

- Fabrics can be regularly vacuumed to prevent build-up of dust and dirt on the fabric surface
- Get to spills and potential stains quickly. Mop up the excess liquid using kitchen roll or a damp cloth. Then clean using a branded upholstery shampoo, detergent or hand wash according to the fabric manufacturer's instructions
- Wipe down acrylic blade screens with a soft, damp cloth and a mild detergent or non-abrasive cleaner to keep the surface clean and hygienic
